

# THE VOICE CLINIC

Department of  
Otolaryngology and Speech Therapy

**THE VOICE** is an integral part of that uniquely human attribute known as speech. To most people, the way in which the voice is produced is a mystery.

Today, the advent of modern instrumentation has enabled the study of the voice as it has never been possible to do in the past - through sophisticated imaging and acoustic analysis.

**THE VOICE CLINIC** in Singapore General Hospital provides all users of voice with specialised analytical studies of laryngeal function. For professional voice users, these analysis allow specific identification and management of difficult vocal problems.

*Videostroboscopy*

*Vocal Folds*
