

PGAHI Website & Training e-Directory

Do keep your eyes peeled for the upcoming SGH-PGAHI Training e-Directory 2019, which includes a suite of courses extending to Research, Pedagogy and Inter-professional programmes, alongside Discipline-focused training in clinical areas.

This e-directory brings you a user-friendly format of course categorisation by profession with colour-coding, enabling you a full sight of courses which might interest you at a glance. It is also grouped for your easy viewing, by Discipline-Focused and Multidisciplinary category.

We would like to thank our team of trainers for their dedication and commitment in providing these professional programmes, to meet healthcare demands of the nation.

PGAHI Faculty Re-appointment and Nomination 2018-2020

PGAHI Faculty and Educators

It is our privilege to have a team of educators with rich clinical experience, who have dedicated their precious time imparting their knowledge and skills to Allied Health Professionals (AHPs).

All of them share a common goal in nurturing the next generation of AHPs to enhance quality standards and provide best value in patient care through Continuous Professional Education (CPE).

We would like to express our heartfelt thanks to our Faculty members who fully embodies the statement "Patients At The Heart of All We Do". Also a warm welcome to our newly appointed members whom we look forward to working closely together in providing quality education.

AM•EI Golden Apple Award 2018

Dr Dawn Tan is an active and passionate faculty member of PGAHI. Her teaching with PGAHI started more than ten years ago. She has been deeply involved in the work of education to help meet the professional needs of the Physiotherapy community. Apart from teaching short courses, Dawn, together with several other Faculty members, also commits herself to a few evenings, at the expense of her personal time, to teach the 4-month Advanced Certificate in Physiotherapy course .

We would like to thank Dawn for her tireless efforts in imparting her knowledge in Allied Health research and education!

Hospital

New Courses

PGahi strives to help keep healthcare professionals abreast of current knowledge and new skills in the respective healthcare fields. This is especially important in a rapid changing healthcare landscape.

Six new programmes were introduced in Calendar Year 2018, with each course achieving near full class size of an average of 22 out of 23 participants. This would not be possible without the commitment of the trainers for the following courses:

- Stuttering in School-aged Children: Is Treatment still Effective?
- Shoulder Rehabilitation
- Imaging of Lower Limbs
- Scar Tissue Release and Integration Technique (STRAIT) Method™ Course
- Training Fitness After Stroke: Putting It Into Practice
- Dysfunctional Breathing Patterns: Pathology, Assessment and Management

SGH Physiotherapists

Physiotherapists specialise in developing and maintaining people's ability to move and function. In addition to their clinical work, SGH Physiotherapy department has been active in fulfilling the clinical competencies of the local healthcare sector. Out of 76 programmes, 19 of them were initiated by the department in Calendar Year 2018.

SGH Physiotherapists also collaborated with other healthcare professionals as a multidisciplinary team to conduct training programmes at PGahi. These courses include the Clinical Reasoning in Physiotherapy Management of Stroke and Vestibular Rehabilitation course. Both courses were well-received by participants with satisfaction mean rating index (MRI) of at least 4.0, on a 5-point rating scale, with 5 being the highest rated score.

We would like to show our appreciation to our course educators from SGH Physiotherapy for their zealous dedication and contributions to Allied Health education!
