

Continuing Professional Development Lecture: Understanding Mental Illnesses Series – Going Beyond the Surface Part 8 - What is Prolonged Grief Disorder? 27 July 2022

Synopsis

Grief is a natural part of life. But what is grief, and when does normal grief become a disorder?

At the end of this talk, participants will be able to:

- Learn about the processes of grief.
- Differentiate between normal grief and prolonged grief disorder.

Speaker

Dr Evelyn Boon PhD
Senior Principal Psychologist
Head, Psychology
Singapore General Hospital

Evelyn has worked in the mental health field since 1995 and is currently Head of Psychology at SGH. She started her career in the field of addictions and now specialises in body image, eating disorders, diabetes and trauma. She is trained in various therapeutic approaches, including hypnotherapy and Eye Movement Desensitisation and Reprocessing. She is passionate in advocating for mental health and well-being as well as creating more understanding of mental illnesses.
