

Continuing Professional Education Lecture: Management of Eczema & Psoriasis 10 November 2021

Synopsis

Atopic Eczema and Psoriasis are the most common inflammatory skin diseases worldwide. The burden of disease is significant and quality of life is often impaired. The mechanism of disease involves an interplay of genetics, skin barrier and inflammation as well as external triggers. Optimal management involves stratifying the disease severity, choosing appropriate modality as well as addressing triggers and external factors. In this talk, the clinical aspects of these diseases as well as broad principles of their management will be shared.

After the lecture, the participants will be able to:

- Understand clinical aspects of atopic eczema and psoriasis
- Explain broad principles of managing these diseases

Speaker

A/Prof Lee Haur Yueh
Head and Senior Consultant
Department of Dermatology
Director, Allergy Centre
Division of Medicine

A/Prof Lee graduated from the National University of Singapore in 2002.
