

Continuing Professional Education Lecture: An Allergist's Approach to Beta-lactam Allergies

12 June 2019

Synopsis

Beta-lactams are the most commonly used antibiotics, but hypersensitivity reactions are common and complex to manage. Clinicians are often faced with the dilemma of choosing alternative antibiotics which may be less efficacious and more toxic.

This discussion focuses on the pharmacologic mechanisms of beta-lactam allergies and an allergist's approach in diagnosing true beta-lactam allergies and evaluating for the safe use of alternative beta-lactams.

Speaker

Dr Adrian Chan
MBBS, MRCP (Edin), MSc (Allergy)

Dr Chan obtained his medical degree from the National University of Singapore in 2006. He completed his specialty training in Respiratory and Critical Care Medicine in Singapore General Hospital in 2013. He went on to pursue training in Asthma and Allergy and obtained an MSc in Allergy from the University of Southampton, UK in 2015.

Dr Chan's interests are in allergy and intensive care medicine. He is also actively involved in teaching medical students, doctors and nurses. He serves as an Associate Program Director in the Singhealth Internal Medicine Residency Program. In addition, he's a Clinical Tutor for the Yong Loo Lin School of Medicine.
