POSTGRADUATE
ALLIED HEALTH INSTITUTE

Essential Medical Terminology and Symptomatology

22 to 25 April 2024

Introduction

This intensive four half-day course is specially designed for non-medical staff working in healthcare institutions. It is intended to help them to get a quick grasp of the basic medical terminology and disease care concepts with the goal of making their role in the hospital more meaningful.

Course Objectives

By the end of the training, participants will be able to:

- Describe the basic human body structure and function
- List common symptoms and investigations.
- Decipher the entries made by doctors in patient records
- Describe the impact of physiology on psycho-social-emotional health in patient care

Target Audience

Non-Medical Healthcare staff, including Allied Health Professionals

Course Outline

- Basic anatomy and function of the human body
- Terminology of common diseases and medication
- How dysfunction relates to social handicaps & psychological stress
- Medical symptomatology & what brings patients to hospital
- Common investigations – when & why some tests are chosen over others
- Medical abbreviations
- What constitutes holistic care?
