

# Influencing Behaviour Through Person-centred Approach (Part 2):

## Promoting a Person-centred Care Culture to Support the Needs of Persons with Dementia

**17 – 19 January & 17 February 2022**

### Introduction

This course is an extension of Influencing Behaviour in Dementia Care Through Person-centred Approach course (Part 1). In this advanced course, participants will expand on the prior knowledge gained in Part 1 towards promoting a person-centred care culture to support the needs of persons with dementia. The presentation and discussion session will enable participants to deepen and expand their knowledge beyond direct patient care towards establishing a person-centred care culture.

### Course Objectives

1. Review the Person-centred approach (PCA) using the Enriched Model of Dementia Care to influence responsive behaviours of persons with dementia.
2. Explain the case for Person-centred Care to promote culture change
3. Consider person-centred care principles to influence care practices
4. Apply strategies to promote adoption of person-centred care culture and/or practices

### Course Outline

1. Reflections and Experiential Activity
2. Review of Enriched Model of Dementia Plans
3. The need for Person-centred Care
  - a. Explaining the case for a person-centred care
  - b. Defining the person-centred care principles and culture
  - c. Applying person-centred care principles into care practices
4. Apply strategies to promote a person-centred care culture
  - a. Fundamentals of culture change to promote person-centred care
  - b. Select and prioritise care practices for quick wins
  - c. Develop action plans and strategies to promote person-centred care practices
5. Assessment: Case studies in Person-centred Care

### Target Audience

1. Participants should have completed Part 1. Participants will have to come with a case study of an existing patient and an Enriched Model of Dementia Care Plan for this course
2. Healthcare Professionals working in Dementia Care setting
