

Advanced Respiratory Care and Exercise Prescription in Chronic Lung Diseases

24 – 30 July 2019

Introduction

Patients with chronic lung diseases can be broadly categorised into obstructive and restrictive dysfunction based on spirometry parameters. Besides respiratory dysfunctions, these patients often develop secondary muscular and psychosocial dysfunctions. This course aims to equip physiotherapists with necessary skills to manage the complex cardiopulmonary problems in patients with chronic lung diseases, such as chronic obstructive pulmonary disease (COPD), chronic suppurative lung diseases, asthma and interstitial lung disease (ILD).

Course Objectives

At the end of the course, the participants should acquire:

- 1) Advanced understanding of the pathophysiology, diagnosis and management approach of patients with COPD, chronic suppurative lung diseases and ILD
- 2) Advanced skills to assess and provide holistic management for patients with chronic lung disease
- 3) The ability to gather, interpret and synthesise information to evaluate the impact of chronic respiratory disease on quality of life
- 4) Latest knowledge and skills to update existing pulmonary rehabilitation programme or to implement new programmes

Course Outline

The course will incorporate a series of lectures and practical sessions to facilitate learning and discussion.

Topics covered:

- Introduction to chronic lung diseases and role of physiotherapy
- Non-invasive ventilation, critical care and physiotherapy adjuncts
- Dysfunctional breathing
- Pulmonary rehabilitation

Target Audience

Physiotherapists with working experience who are starting to specialise in cardiopulmonary physiotherapy, as well as for experienced clinicians as a refresher course.
