INTRODUCTION

The course will aim to provide participants with the knowledge and skills needed to diagnose, classify and treat this diverse and complex group of patients with lower quadrant disorders. The workshop will have a good mix of theory, case discussions and practical work.

OBJECTIVES

- At the end of the course, the participants should be able to:
- Efficiently perform a physical assessment of the lower quadrant.
 - Discuss and clinically reason through the differential diagnosis of common lower quadrant dysfunction.
 - Formulate an effective treatment plan for lower quadrant dysfunctions
 - Interpret basic radiological findings for the knee.

TARGET PARTICIPANTS

Physiotherapists with 2-5 years of working experience in the area of musculoskeletal physiotherapy.
