Continuing Professional Development Lecture:
The Anxiety Inventory for Respiratory Disease Scale for Patients with COPD

Synopsis
Anxiety is common in patients with chronic obstructive pulmonary disease (COPD). However, it is often inadequately treated, partly because of lack of a disease-specific scale to measure anxiety in patients with COPD. Our group in Manchester has developed the new Anxiety Inventory for Respiratory Disease (AIR) to measure anxiety in patients with COPD. The AIR scale has ten times. It is a valid, reliable and responsive scale to pulmonary rehabilitation programme. It is a promising scale to measure anxiety and may help to improve clinical practice and research for patients with COPD.

Speaker

Dr Abebaw Yohannes
Dr Yohannes is an Associate Professor at the Manchester Metropolitan University. He has obtained his MSc and PhD in Geriatric Medicine from the University of Manchester. He has published over seventy-five articles predominantly focused in relation to the management of COPD. Dr Yohannes is an Associate Editor for the BMC Geriatrics, Health and Quality of Life Outcomes and editorial board member for the Chest journal. He is a Fellow of the American College of Chest Physician (FCCP).

Lecture Details:
Date 27 April 2015 (Monday)
Time 6.00 pm – 7.00 pm
Venue L1-S2 (Level 1), Academia
20 College Road
Singapore 169856

Registration starts at 5.30 pm
Light refreshments will be served before the lecture

Target Audience
Physiotherapists and other allied healthcare professionals who are involved in the respiratory field

Fee
$8 per pax (SGH staff)
$10 per pax (Regular)
Cash payment can be made on-site

This lecture is accredited for 1 CME point
Registration Form
