

Continuing Professional Development Lecture:

Chronic Upper Limb Pain in Stroke: Factors Impacting, Beliefs & Perceptions, and Clinical Implications 3 October 2019

Synopsis

This presentation will provide an update on understanding of chronic pain following stroke, with particular focus on the upper limb. It will present the findings of Brendon's PhD of the same topic, which is due to be submitted at the end of 2019, based on his studies involving more than 500 individuals with stroke, and discuss potential clinical options based on these findings, and how this aligns with appropriate evidence or clinical guidelines that are already in place.

Speaker

Brendon Haslam is a physiotherapist from Melbourne, Australia currently working clinically in private practise in the areas of neurological and pain

rehabilitation, having previously worked for more than 20 years in hospital based rehabilitation. He is a Senior Research Fellow at La Trobe University. His research is primarily concerned with increasing understanding in areas of sensory dysfunction and chronic upper limb pain following stroke, and the development of scientifically based treatments.

He has been awarded titling in both Pain and Neurological Physiotherapy by the Australian Physiotherapy Association, and is a faculty member of the Neuro Orthopaedic Institute, responsible for presenting courses in pain sciences for clinicians.

Lecture Details

Date : 3 October 2019 (Thursday)

Duration : 1 hour

Time : **6.00 pm – 7.00 pm**

Venue : Learning Space Room 4/5

Singapore General Hospital Block 6 Level 1, Outram Road

Singapore 169608

Fee : **Complimentary**

Target Audience

Allied Health Professionals working with stroke patients
