Continuing Professional Education Lecture

Tackling Antimicrobial Resistance: Antibiotic Combination Therapy in the Singapore Context

Synopsis

Antimicrobial resistance is a global public threat that requires action from all government sectors and society. The on-going explosion of antibiotic-resistant bacterial infections continues to plague global and Singapore healthcare. Currently, a growing problem of nosocomial antibiotic-resistant bacteria infections had been fuelled by the lack of fewer and new effective antibiotics now or in the next 10 years.

In this presentation, I will attempt to show what are the common challenges faced at the bedside with extensively drug-resistant bacterial infections, highlight the considerations on appropriate antibiotic combination selection, and discuss a precision medicine approach to arrive at rationally-optimized antibiotic combination chemotherapy regimens tailored to individual clinical scenarios.

Speaker

Dr Lim Tze Peng
PhD, BSc (Pharm) (Hons)

Dr Lim is a Senior Principal Pharmacist Researcher with the Pharmacy Department at Singapore General Hospital (SGH).

He was awarded the Transition Award in 2017 by the National Medical Research Council (NMRC) of Singapore. His research interests include antimicrobial pharmacokinetics/pharmacodynamics and infectious disease therapeutics. He also holds a position as Assistant Professor, Medicine Academic Clinical Programme at the SingHealth Duke-NUS AMC.

Lecture Details

Date	24 October 2018 (Wednesday)
Time	6.30 pm - 7.30 pm
Venue	Learning Space Room 4/5 Singapore General Hospital Block 6 Level 1, Outram Road Singapore 169608
Target Audience	Pharmacists & All Allied Health Professionals (Limited to 100 pax, on a first-come-first-served basis; as seats are limited, walk-in registration may not be accepted).
