

Diabetes Nutrition Course

25 February 2021

Introduction

This course aims to equip the multidisciplinary diabetes healthcare providers with **basic and important** nutrition knowledge on diabetes. This helps to create an awareness in the healthcare, social service and non-profit sector on the role of nutrition in the outcome of diabetes management.

Course Objectives

This course aims to:

- educate multidisciplinary diabetes healthcare providers with basic yet important nutrition knowledge on diabetes
- debunk misconceptions surrounding diet and diabetes
- emphasize the importance of using self-blood glucose monitoring as a tool to better achieve the control of blood glucose level and to see how different foods affect blood glucose levels

This course is not meant to enable participants to provide Medical Nutrition Therapy to patients with diabetes.

Course Outline

- Nutrition in diabetes management
- Diabetes nutrition recommendations – current updates
- Eating with Diabetes
 - How foods affect blood glucose levels
 - Types of carbohydrate
 - Quantifying carbohydrates
- Meal Planning with Diabetes
 - 8 golden rules
 - Dietary modification – beyond carbohydrates
- Armchair supermarket tour
 - Label reading in meal planning
 - Nutrient claims

Target Audience

Healthcare Professionals (excluding dietitians) who wish to acquire basic nutrition knowledge in providing clinical care to diabetic patients.
