Functional Capacity Evaluation Training

25 – 27 Mar 2019

INTRODUCTION

This 3 day course is designed to instruct therapists in the administration and scoring of the Physical Work Performance Evaluation (PWPE). The PWPE is a functional capacity evaluation that has been tested for reliability and validity. The test is used in determining the physical work abilities of an injured worker, in prescribing treatment for work-hardening or work-conditioning of the injured worker and, in post-offer screening. The course will involve lectures, videotapes, patient case examples and hands on practice with administering and scoring the performance of two patients. Upon completion of the course, participants will be certified to administer the Physical Work Performance Evaluation.

OBJECTIVES

Upon completion of the workshop, the participants will be able to:

- Describe the purpose of the Physical Work Performance Evaluation and the usefulness of the information generated by the evaluation.
- Administer and score the 4-5 hour Physical Work Performance Evaluation.
- Identify the movement patterns and body alignments that indicate a submaximal, near-maximal, and maximal effort during the testing process.
- Identify unsafe body mechanics during lifting tasks and teach proper lift techniques.
- Identify the level of patient or client participation in the testing procedure.
- Interpret the findings of the Physical Work Performance Evaluation.
- Generate a meaningful and useful summary report of the evaluation that can be sent to the referral source.
- Communicate and discuss the results of the test with other health care providers.
- Relate the findings of the Physical Work Performance Evaluation to work conditioning and work hardening goals.

OUTLINE

The first and second days of training involve classroom-style teaching, watching, discussing, and scoring a video of a patient performing the tasks of the PWPE. The third day will involve watching and independently scoring another video of a patient.

CERTIFICATION CRITERIA

Complete attendance is required for certification.

The trainee must achieve 85% agreement with the instructor on the patient's safe level of work for the 21 major tasks of the evaluation.

The trainees must be able to demonstrate proficiency in performing several neurological and vascular screening exams described under "Advance Preparation".

Advance preparation: Prior to the course, each participant should read the pertinent sections in David J. Magee's text. Those who are unfamiliar with the screens should practice with colleagues prior to the training. The trainer will be happy to answer any questions the trainees may have concerning these screenings before they are required to demonstrate proficiency. The musculoskeletal screens are well outlined and described in Orthopedic Physical Assessment by David J. Magee, PhD, BPT. Details will be given in the pre-readings to participants.

FACULTY

Mr Andrew Mills
BSc (Hon) Biokinetics
ErgoScience certified trainer

COURSE DETAILS

Date	: 25 – 27 Mar 2019 (Mon – Wed)
Time	: 8.30 am – 5.00 pm
Venue	: Academia 20 College Road Singapore 169856
Fee	: \$2400 per pax Fee is inclusive of 7% GST

TARGET AUDIENCE

Participants must be a licensed Occupational Therapist or Physiotherapist.

All trainees must bring a copy of their license to the training session.
