

Influencing Behaviour through Person-centred Approach (Part 2): Promoting a Person-centred Care Culture to Support the Needs of Persons with Dementia 13, 14 & 28 March 2024

Introduction

This course expands on Influencing Behaviour in Dementia Care Through Person-centred Approach (Part 1). Participants will expand on the prior knowledge gained in Part 1 towards promoting a person-centred care culture in supporting the needs of persons with dementia. The case presentation session will enable participants to deepen and expand their knowledge beyond direct patient care towards establishing a person-centred care culture.

Course Objectives

1. Review the Person-centred approach (PCA) using the Enriched Model of Dementia Care to influence responsive behaviours of persons with dementia.
2. Explain the case for Person-centred Care to promote culture change
3. Consider person-centred care principles to influence care practices
4. Apply strategies to promote adoption of person-centred care culture and/or practices

Course Outline

1. Reflections and Experiential Activity
2. Review of Enriched Model of Dementia Plans
3. The need for Person-centred Care
 - a. Explaining the case for a person-centred care
